PROFESSIONAL SUMMARY

IT Professional with 11+ years of experience in ETL development, Data Engineering, and Solution Architecture, specializing in Talend and Databricks. Expert in Azure Data Factory, Azure Data Lake Storage, Azure Synapse, and cloud-based data pipelines. Currently architecting end-to-end data flows and manufacturing data solutions at Wright Shore Technologies, an ODC supporting KetteQ's operations. Demonstrated history of delivering ETL solutions across Data Warehousing, Medallion Architecture, and Business Intelligence projects in Agile/Kanban environments. Skilled in leading technical teams, interacting with onshore/offshore clients, and ensuring zero-escalation delivery. Certified in both Talend and Databricks with extensive cross-domain experience spanning Supply Chain, Oil & Gas, Life Sciences, Healthcare, and Health Insurance.

TECHNICAL EXPERTISE

ETL Tools: Talend (Data Integration, Big Data, Cloud), Azure Data Factory (ADF), Azure Data Bricks

Cloud & Storage: Azure Data Lake Storage (ADLS), AWS S3, Azure Synapse

Databases: Oracle, MSSQL, Amazon Redshift, Azure Synapse, Salesforce

Languages: SQL, PL/SQL

DevOps & CI/CD: Jenkins, XL Release, XL Deploy, Azure DevOps, GitHub, Bitbucket, Nexus

Scheduling & Tools: Control M, TAC, Jira, Postman

PROFESSIONAL EXPERIENCE

WRIGHT SHORE TECHNOLOGIES PRIVATE LIMITED

Mar 2025 – Present

Senior Technical Consultant – Solution Architect & ETL Lead *| Hyderabad (WFH)*

- Responsible for end-to-end architecture of the data flow across the system as Senior Technical Consultant.
- Performed Data Modeling and defined Entity Relationship structures in the database for supply chain and after-market service management domains.
- Designed and developed ELT and ETL pipelines using Talend Cloud and in-house engine jobs for data ingestion, transformation, aggregation, and cleansing.
- Developed generic pipeline solutions to provide reusable common functions across multiple teams, significantly improving system performance and consistency.
- Built multiple AI-based implementations to deliver customized configurations to clients, along with cumulative reports aggregating the entire set of customizations.

KEY PROJECT AT WRIGHT SHORE TECHNOLOGIES:

Zeus – Polymer Extrusion Manufacturing (Mar 2025 – Present)

Environment: Talend Cloud, In-House Engine Jobs, SQL, Data Modeling, AI Configurations

- Zeus is a leading manufacturer of high-performance polymer extrusions, specializing in fluoropolymer tubing (PTFE, FEP, PFA), heat shrink, and fiber optic coatings. They serve industries like medical, aerospace, and energy, providing custom, tight-tolerance components such as catheters, wire insulation, and bioabsorbable.
- Architected and Developed complete data flow covering ingestion from multiple source systems, through transformation layers, to final reporting outputs.

- Developed reusable ETL/ELT framework components shared across multiple product teams to standardize and accelerate delivery.
- Built AI-driven configuration modules enabling client-specific customizations with consolidated cumulative reporting dashboards.

ERNST & YOUNG (EY GDS)

Jun 2021 – Mar 2025

Senior II – Data Engineer / Technical Lead | *India*

- Senior ETL Developer and Technical Lead for Petronas and Merck enterprise data projects.
- Designed and developed Databricks Framework for Medallion Architecture (Bronze/Silver/Gold layers).
- Developed Azure Data Factory ELT pipelines to extract data from multiple heterogeneous sources into ADLS.
- Created Databricks Workflows using Generic Framework with metadata-driven notebook execution.
- Designed Source-to-Bronze parquet file generation and loaded Delta Live Tables in Silver/Gold layers.
- Utilized Bulk Execution operations to load data into Azure Synapse from various source systems.
- Deployed jobs in Nexus repository; managed feature branches and master branch merges.
- Led team collaboration through Azure DevOps board, created user stories and managed deliverables.
- Analyzed BRDs and STM documents for data extraction logic and business implementation.
- Acted as Technical Lead providing support and ensuring zero escalations with clients.

KEY PROJECTS AT ERNST & YOUNG:

Petronas – Enterprise Data Hub (Dec 2021 – Mar 2025)

Team Size: 10+ | Environment: Azure Data Bricks, Azure Data Factory, Talend, ADLS, Azure Synapse, Postman

- Designed ETL mappings and workflows to fetch data from multiple heterogeneous sources (.json, .xml, .csv, .xlsx, APIs) into relational target systems.
- Involved in Databricks Framework Design and Development loading data into Medallion Architecture.
- Developed multiple workflows and pipelines for ETL processes using Azure Databricks and Azure Data Factory.
- Led the ETL team and managed resources across project tracks.

Merck – Data Transformation & Automation (Jun 2021 – Dec 2021)

Environment: MSSQL, Power Automate

- Collaborated with Business Analysis team for requirements gathering and documentation.
- Created MSSQL Stored Procedures for complex data transformations and automated forecast reporting.
- Developed views for downstream applications loading data into dashboards via Power Automate.
- Reduced manual effort by 20x through automation of forecast information onto business dashboards.
- Prepared Technical Documentation for all stored procedures for future reference.

CAPGEMINI TECHNOLOGY SERVICES INDIA LIMITED

Oct 2019 – Jun 2021

Consultant – ETL Developer | *India*

KEY PROJECT:

Johnson & Johnson – ETL Development (Oct 2019 – Jun 2021)

Environment: Talend, Control M, TAC, Oracle, MSSQL, Redshift DB, Salesforce, S3, MBox

- Worked with Business Analysis team gathering requirements and creating Functional and ETL specification documents.
- Used Control M for scheduling and TAC for job deployment; managed Nexus repository deployments.
- Analyzed BRDs and STM mappings to design Talend ETL jobs end-to-end from dev to production.
- Developed and implemented performance tuning strategies for jobs handling large data volumes.
- Used Salesforce components in Talend for loading data to Salesforce objects.
- Ingested large files from various sources into AWS S3 bucket with data transformations.
- Performed Unit Testing and peer reviews ensuring adherence to business requirements.
- Implemented SCD Type-1, Type-2, and Type-3 Dimensional tables.

OPTUM GLOBAL SOLUTIONS PVT LTD *Feb 2015 – Oct 2019*

Software Engineer – ETL Developer *| Hyderabad*

KEY PROJECT:

United Health Group – Data Warehousing & ETL (Feb 2015 – Oct 2019)

Environment: Talend, MSSQL, Oracle, Jenkins, XL Release, XL Deploy, GitHub, TAC

- Interacted with Business Analysis team for requirements gathering and Functional document creation.
- Led Data Stage to Talend migration initiative for legacy ETL jobs.
- Developed Talend mappings using multiple Talend components
- Imported data from various sources, transformed, and loaded into Staging and Data Warehouse.
- Developed data mappings between source systems and warehouse components using Mapping Designer.
- Created reusable joblets and developed checkpoint framework and logging mechanisms.
- Implemented Slowly Changing Dimension (SCD) mapping logic.
- Carried out unit testing and peer reviews; managed export/import of Talend jobs.

CERTIFICATIONS

- Talend Data Integration Certified Developer
- Databricks Certified Data Engineer Associate

BUSINESS DOMAINS

Oil & Natural Gas Supply Chain Management | Life Sciences | Healthcare | Health Insurance

KEY CLIENTS

Zeus | Petronas | Merck | Johnson & Johnson | United Health Insurance
